

PARTNERSHIP OPPORTUNITIES

WHY SPONSOR IT MATTERS?

At IT Matters we would like to bring the tech community together to talk about building more diverse, inclusive and stronger teams.

We believe diversity makes the tech teams more productive and stronger.

We trust that diverse and inclusive teams make better products. We think that most of the problems can be solved by effective communication, conscious leadership and empathetic approach. We know it's important to bring discussion about diversity and inclusion out into the open.

By partnering with IT Matters, you will build awareness in the tech community. Show that IT matters to you and to your organisation too!

IT Matters is a space for a variety of working IT professionals who are passionate about not only their technical skills but also about personal growth. We especially welcome managers, team leaders and all those who work with people and not only with their skills.

Join us in September in Warsaw for this event and we promise we will do our best to make your presence unique and engaging.
